

Chicago (Turabian 9th Edition) Citation Style Update

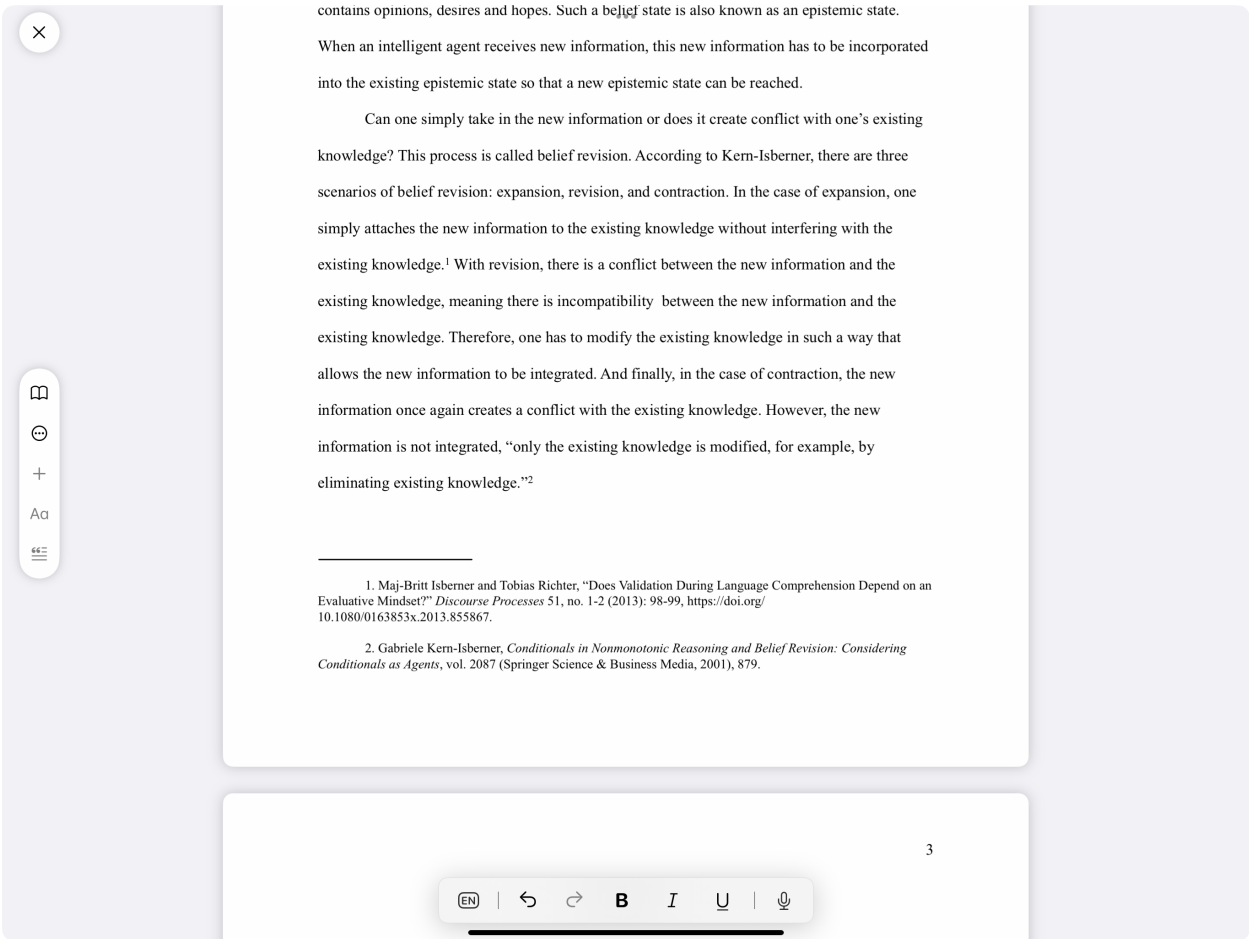

Essayist Update - Chicago (Turabian 9th Edition) Citation Style, Insert Citation Button & Copy/Paste Citations.

Over the last few months, we’ve been working hard on a major update for Essayist. The update is now available on the App Store as of November 20, 2021.

What’s New In This Version

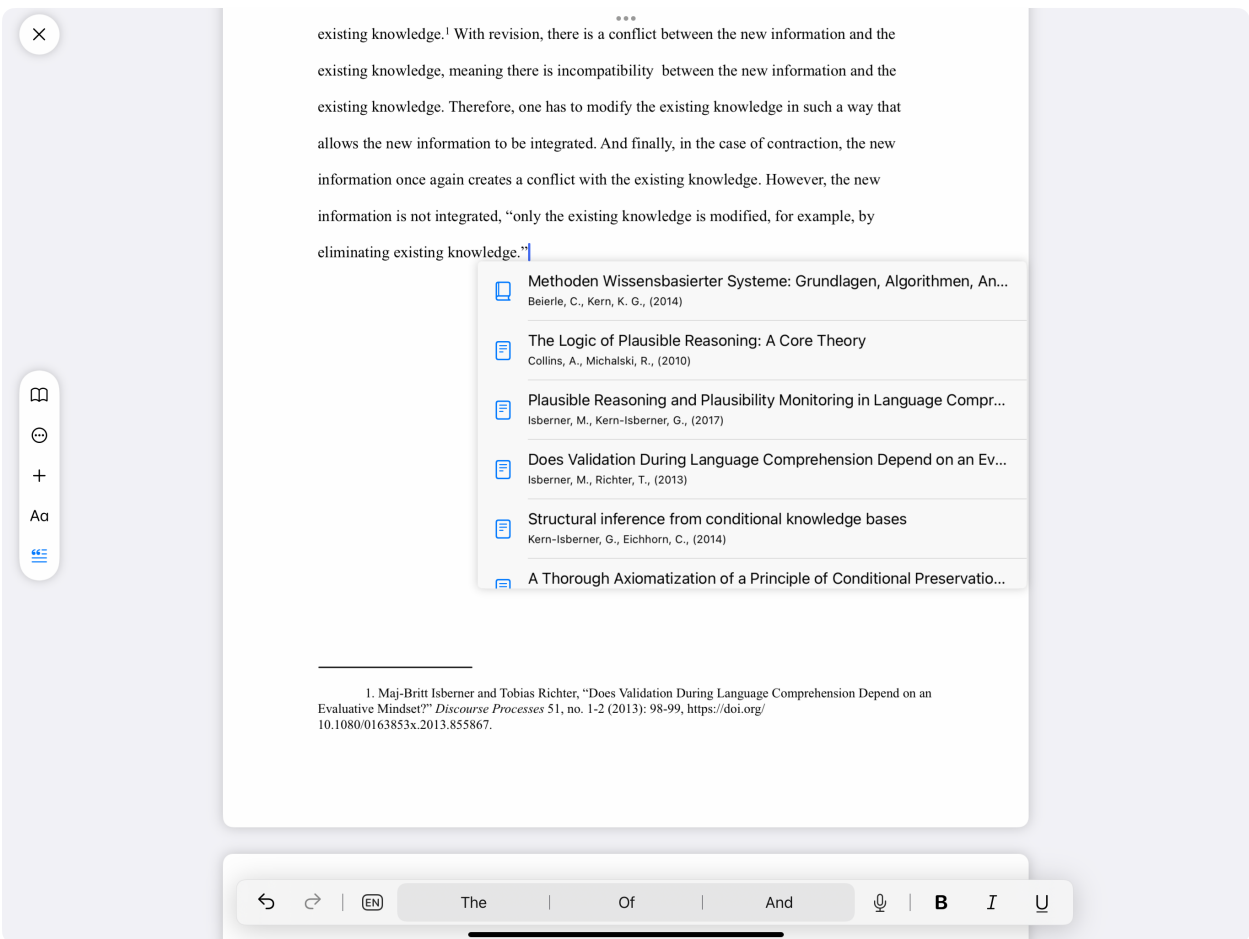

1. Chicago (Turabian) Citation Style

We are very excited to introduce our next citation style: Chicago/Turabian (9th Edition). It supports the Notes & Bibliography version and includes footnotes/endnotes support. Essayist now supports the three most used citation styles (APA, MLA & Chicago).

2. Insert Citation Button

We added an “Insert Citation” button to the menu to make it easier to add citations. It is the last button in the menu bar. Export and Settings can now be found under the “More” button.

3. Copy/Paste Citations

You can now copy/paste text that includes citations and the citation information will be preserved. This feature really gives our users freedom when editing their papers.
